

Building Your Own Framework

Many of the schools we work with already have a set of skills or virtues as part of their ethos and curriculum offer. Achievement Builder gives you the chance keep this approach and enrich the student experience.

We currently work with schools with frameworks built around:

Character virtues
 The Gatsby Benchmarks
 Faith virtues
 Employability skills sets
 Preparing young people for work

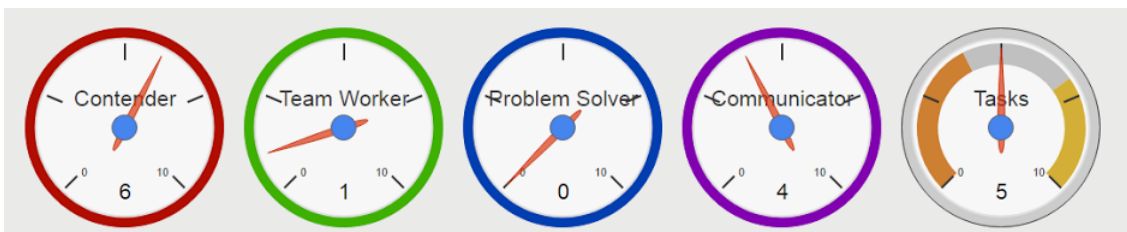

We have a wide range of experience in programme design and implementation and can offer support if you are looking to develop a bespoke skill set.

The Achievement Builder software can create up to 5 levels; in most cases we would recommend a maximum of 3. In our own framework we use 3 levels for secondary school students and 1 level for primary.

If you choose to use your own framework you can still access our task bank, if you wish. There are over 100 starter tasks to choose from, these can be amended and you can add your own.

We would recommend no more than 5 identified skills with linked attributes, for example:

Skill	Attributes
CONTENDER	PARTICIPATING & RESILIENCE
TEAM WORKER	TEAMWORK & LEADING
PROBLEM SOLVER	CREATIVITY & PROBLEM SOLVING
COMMUNICATOR	LISTENING & PRESENTING

Language in the system can also be changed to fit with your framework and descriptors. The number of activities needed to achieve Bronze, Silver and Gold is flexible at each level.

Achievement Builder can be used with a single class, year group or whole school. Pricing starts at just £300+vat, contact us to discuss your needs and receive a full quote.
